APPENDIX A:
CORE SET OF SDOH SCREENING QUESTIONS: TWO ITERATIONS

The following are two iterations of a set of eighteen questions which can form a core set for screening for social determinants of health (across material, personal, social, and parenting well-being). These could be used as a separate screen or as a part of other screens (child health status, family medical history, parent concerns about child development, etc.). The first is a simplified version which organizes the questions in parallel form with common ways to respond (yes, somewhat, no). The second is a version which uses actual validated tools in the precise form they were validated.

SIMPLIFIED INITIAL CORE SET OF SDOH SCREENING QUESTIONS – PARENT SURVEY

The following questions are designed to help us better respond to you and your child and support you as you respond to your child’s growth and health. Please respond to the following questions – all responses will be kept confidential. If you are uncomfortable responding to any of the questions, please feel free to skip them.
