

APPLIED FRAMEWORK FOR ADVANCING MCH MEASUREMENT

Determinants of Health

Bio-genetic factors

Safe, stable, and nurturing relationships

Family, community, and environmental context

Health care systems and services

Public health and population approaches

Policy and macro-economic factors

Measurement Domains

Health status and conditions

Access to and quality of health and related services

Social determinants of health (SDOH)

Measurement Purposes

MCH measurement used at the national, state, local, and clinical levels for purposes of:

- Monitoring health and well-being at the population level.
- Advancing and adapting measures, tools, and approaches for providers/ service settings to use in practice.
- Applying measurement to guide the design, performance measurement, and improvement of programs.
- Building actionable and comparable knowledge through research.
- Using measurement to understand, advance, and ensure equity.

Goal
Positive health and well-being across the life course

MCH Measurement Research Network

An applied, sustainable, multidisciplinary approach to improve outcomes and systems performance on behalf of the nation's children, youth, and families by:

- inspiring, supporting and coordinating efforts,
- driving measurement innovation, and
- promoting shared accountability.
